SUMMARY

I am a **data professional with 5+ years of experience** in marketing science, analytics engineering, and data architecture. I **built the data foundations and reporting systems that power revenue and analytics teams**, from unifying revenue data in Snowflake to creating dashboards which **recovered 10M revenue at risk** and optimized operation by 80%. I've partnered cross-functionally to **improve funnel visibility, and drive measurable business outcomes (improve CRR by 10%)**. I am adaptable, and known for quick thinking that bridges data architecture and business impact.

PROFESSIONAL SKILLS

Data Engineering and Architecture: ETL / ELT design, data modeling, pipeline automation, Snowflake, Redshift, Trino, dbt, API integration, QA frameworks, version control

Business Intelligence & Visualization:

Tableau, ThoughtSpot, Looker Studio, Power BI

Programming & Tools: SQL (advanced), Python (Pandas), R, Git, Jupyter, Bash scripting, Nomad, Krestra, Airflow concepts

Analytics & Measurement: Programmatic media KPIs, incrementality testing (brand lift, cross-channel lift), attribution diagnostics, funnel analysis, statistics, ML, AI

RELEVANT PROFESSIONAL EXPERIENCE

Data Architecture Analyst II at StackAdapt

Jan 2025 to Present | Toronto, ON

- Led a cross-functional workstream to develop and agree on a **single source of truth** for all revenue data stakeholders across the company
 - Build and analyze **customer retention and recurring revenue growth** dashboards that improved customer retention by 10%+ and enabled upsell opportunities, leading to a 20%+ increase in revenue
 - Collaborated with cross-functional teams on **Third-Party Research Automation** to **cut research turnaround from 5 hours to under 1 hour** using custom GPT workflows and external data providers
 - Designed an **Account Pacing dashboard** that improved portfolio visibility and reduced Account Manager workload by 12% (~5 hours saved per AM) across a 500+ person Sales organization. Achieved 400+ ThoughtSpot adoptions and earned strong acclaim for its ease of use
 - Automated CTV Publisher Overlap analysis, enabling clients to identify inventory redundancy and optimize spend, resulting in a **\$640K incremental budget win**
 - Led Digital-of-out-Home (DOOH) strategy to boost spend and retention. Drove **30%+ budget lift** and **influenced DOOH product roadmap** via client feedback
 - Drove adoption of first-party data integrations to increase stickiness and revenue. **Unlocked \$1M+ budget shifts for enterprise clients**
 - Identified outsized impact of first-party data integrations, where **4% of clients generated 15% of revenue, and scaled usage across key accounts**
 - Consolidated Salesforce revenue data into Snowflake for the BizOps team, lowering storage costs, aligning reporting across departments and enabling account prioritization effectively
 - Contributed to **Analytics Modules**, extending **advanced analytics capabilities beyond platform limits**
-

- Mentored analysts and trained account teams on interpreting dashboards and KPIs, driving data literacy and adoption.
- Recognized for leadership and innovation in automation under #WeOnlyWinTogether and #ShowCareTakeAction initiatives.

Programmatic Media Analyst at StackAdapt

Apr 2024 to Dec 2024 | Toronto, ON

- Partnered with Sales and Client Services to evaluate campaign effectiveness through brand lift, reach/frequency, and cross-channel attribution analyses.
- **Developed automated reporting templates** for CTR, CPR, ROAS, and funnel KPIs across ThoughtSpot, Tableau, and Looker Studio, cutting reporting time from 8 hours to under 1 hour.
- Delivered insights that guided budget reallocations, contributing to **ROI improvements of 15% or more** on major client accounts.
- Centralized account data to improve planning for high-tier clients and streamline AM workflows.
- Implemented data QA and validation before client delivery to maintain reporting accuracy and trust. Ensure data accuracy before sending to the client. Improved QA process by 90%.

Reporting Developer at StackAdapt

Jun 2021 to Mar 2024 | Toronto, ON

- **Built foundational data pipelines** that became **the core of the Analytics and Reporting Architecture teams**, establishing standardized data models and scalable reporting.
- Automated multi-platform reporting packs using SQL, Python, and Tableau, reducing manual workload by over 30%.
- Created QA scripts to detect and resolve mismatches, cutting data errors by 50%.
- Developed the **Creative Studio Data Pipeline** and Tableau performance dashboard, supporting a new service tier and operational planning.
- Built **Conversion Journey pipelines** for full-funnel visualization.

Software Developer at Clockk.com

Jan 2021 to April 2021 | Nova Scotia, ON

- Built front-end features in Ember, JavaScript, and TypeScript to improve user experience.
- Ran user testing and applied feedback to UI/UX improvements.
- Migrated services to new APIs with Elixir, boosting performance and maintainability.
- Maintained codebase and resolved bugs in the web app.
